Subject: Governor Brown Issues Order on Aliso Canyon Gas Leak

Justin,

We have been monitoring this event, but no official declaration was made on it at the state level. Today Gov Brown declared a state of emergency for the gas leak. The gas leak is not expected to be repaired until sometime in March. This gas leak has displaced over 2,000 homes/families.

SACRAMENTO - Given the prolonged and continuing duration of the Aliso Canyon gas leak and at the request of residents and local officials, Governor Edmund G. Brown Jr. today issued a proclamation that declares the situation an emergency and details the administration's ongoing efforts to help stop the leak. The order also directs further action to protect public health and safety, ensure accountability and strengthen oversight of gas storage facilities.

Link to the declaration here:
